Preparation and Installation Guide

Compatibility: This product fits Jeep JT Gladiator and is designed to provide as much ground clearance as possible. This bumper requires cutting the bed and removing the factory hitch. If a hitch is desired, combine with MB1186 High Clearance Hitch Reciever.

1. **Prepare and Inspect:** Unbox and inspect all components to ensure everything is included and free of damage.

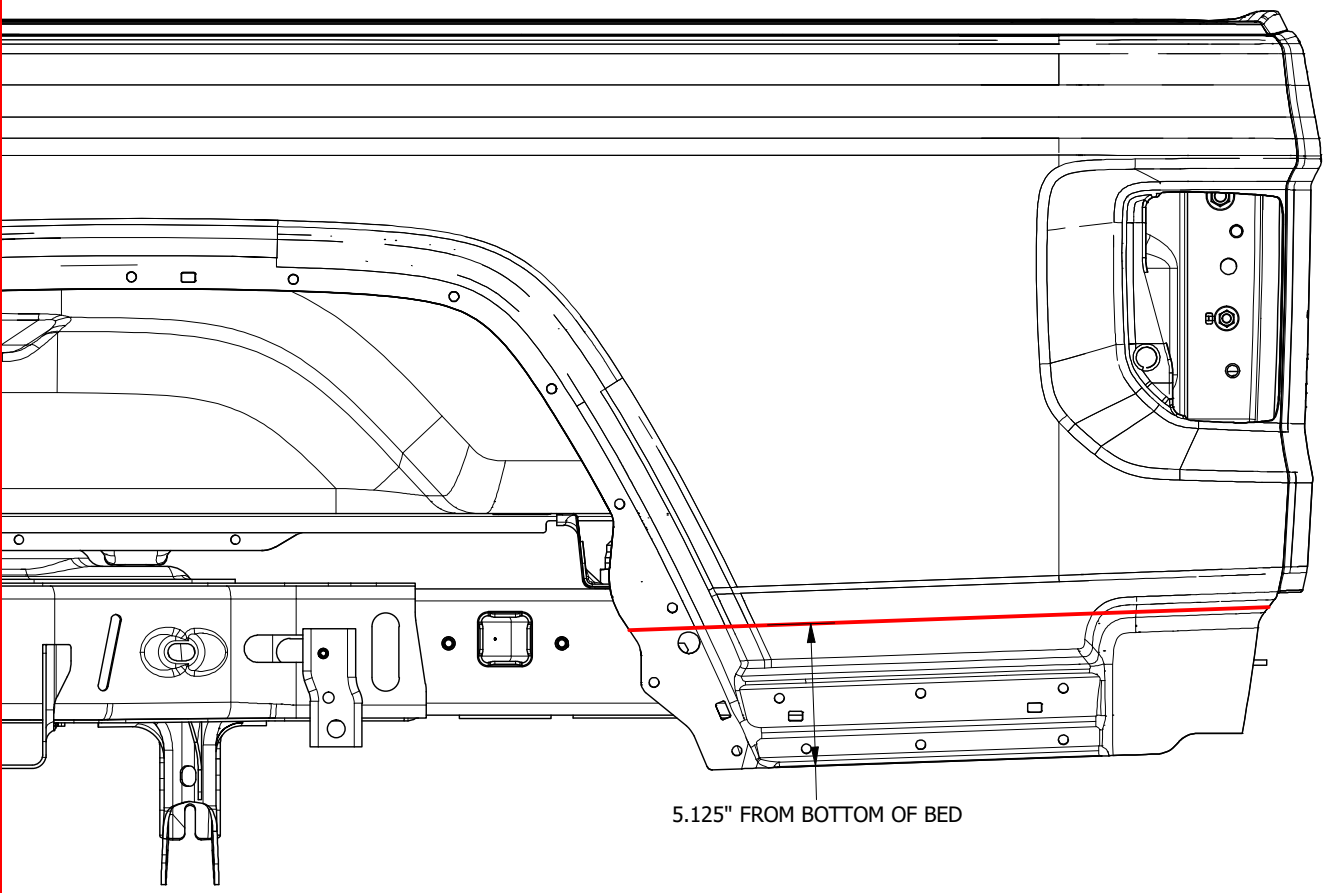

2. **Prep for Install:** Remove the factory bumper and factory tow hooks before beginning installation. If equipped remove rear park sensors and associated wiring harness. Be sure to note sensor location to reinstall in the same location in the new bumper.

3. **Finishing:** For long-term protection, bare metal parts must be painted or powder coated before installation to prevent rust or corrosion.

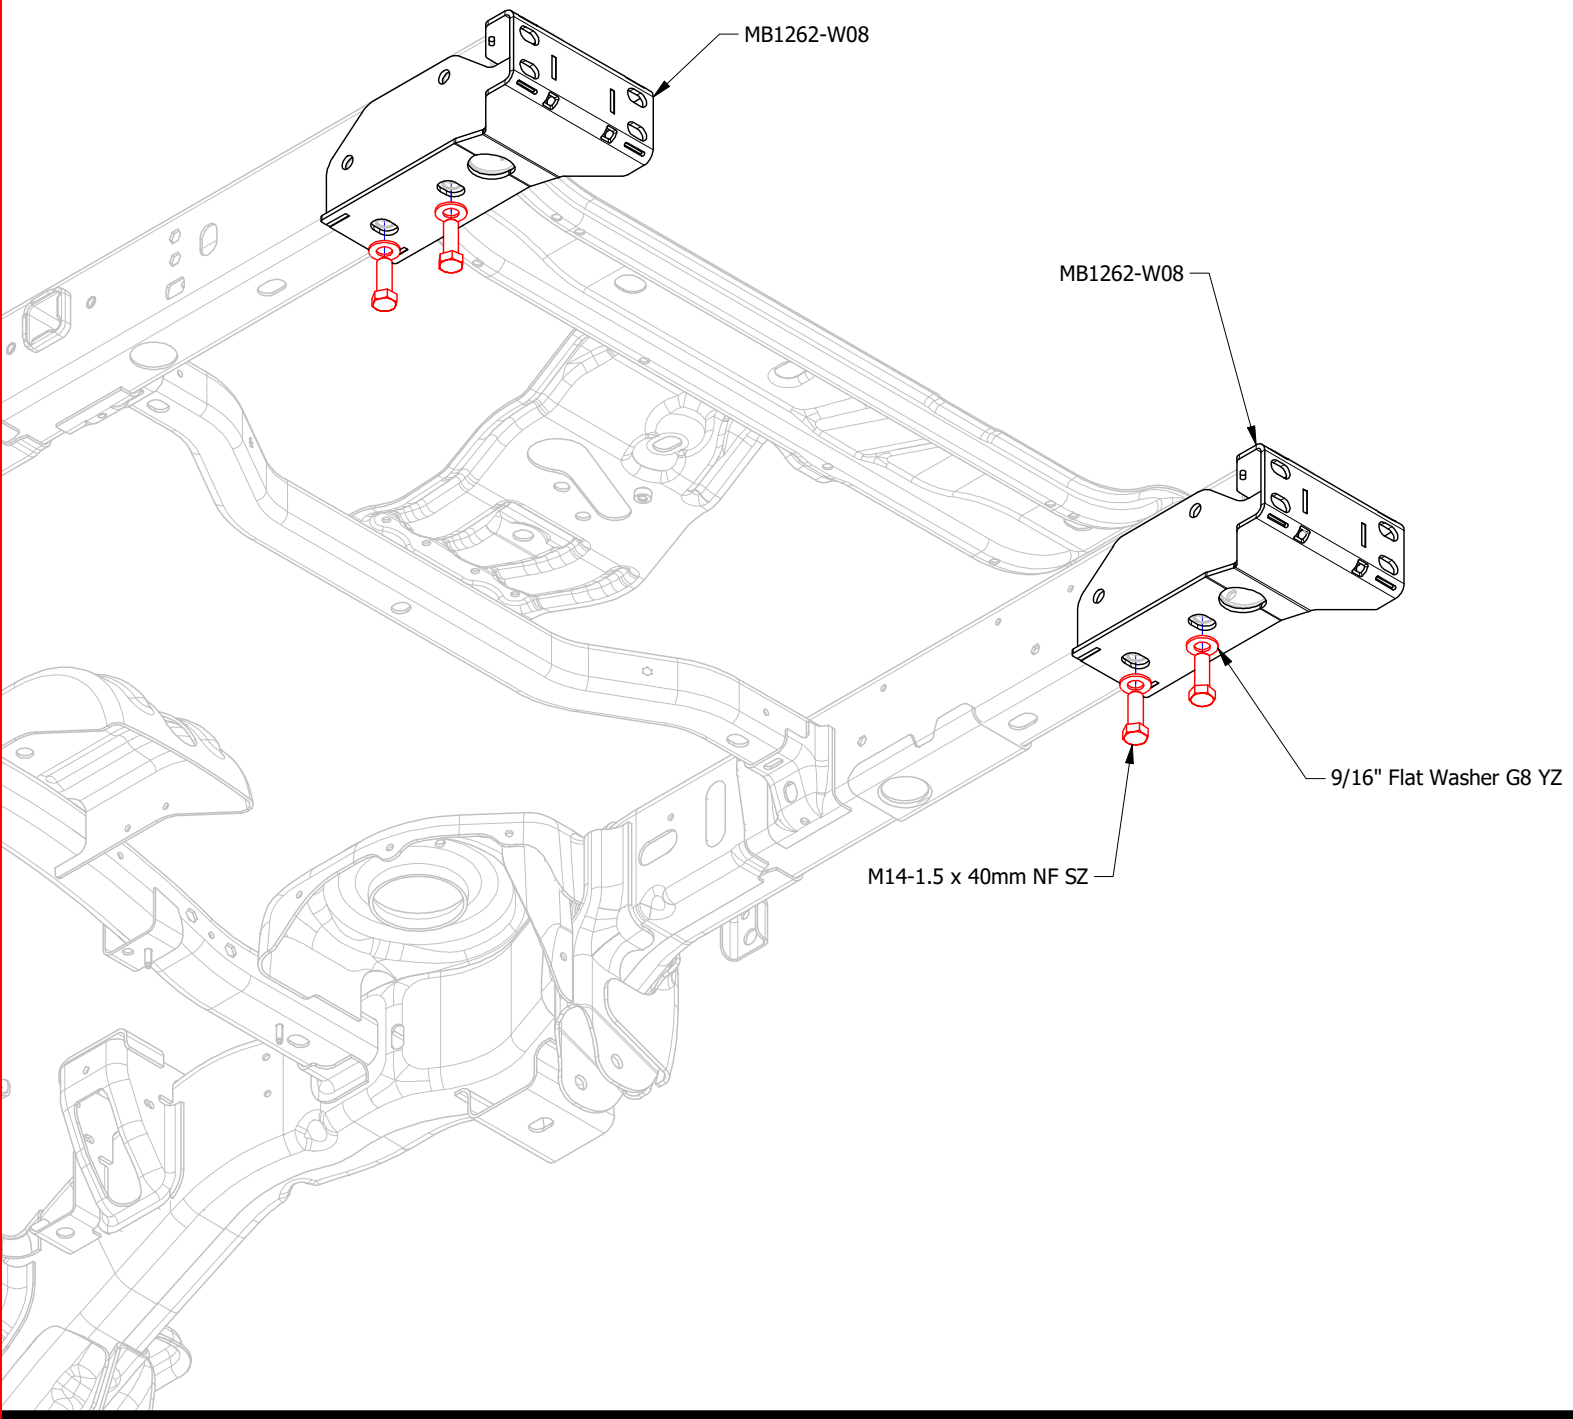

Pro Tip: Use STEEL-IT paint, which can be welded through and easily touched up afterward.
