Preparation and Installation Guide

Compatibility: This product is designed to fit the Jeep JT with a any style bed. This is designed to give the factory frame more support in a critical area that see a lot of load which causes the rear frame to crack.

1. **Factory Component Removal:** This kit will require permanent removal of the factory rear shock mount and rear body mount prior to instillation.

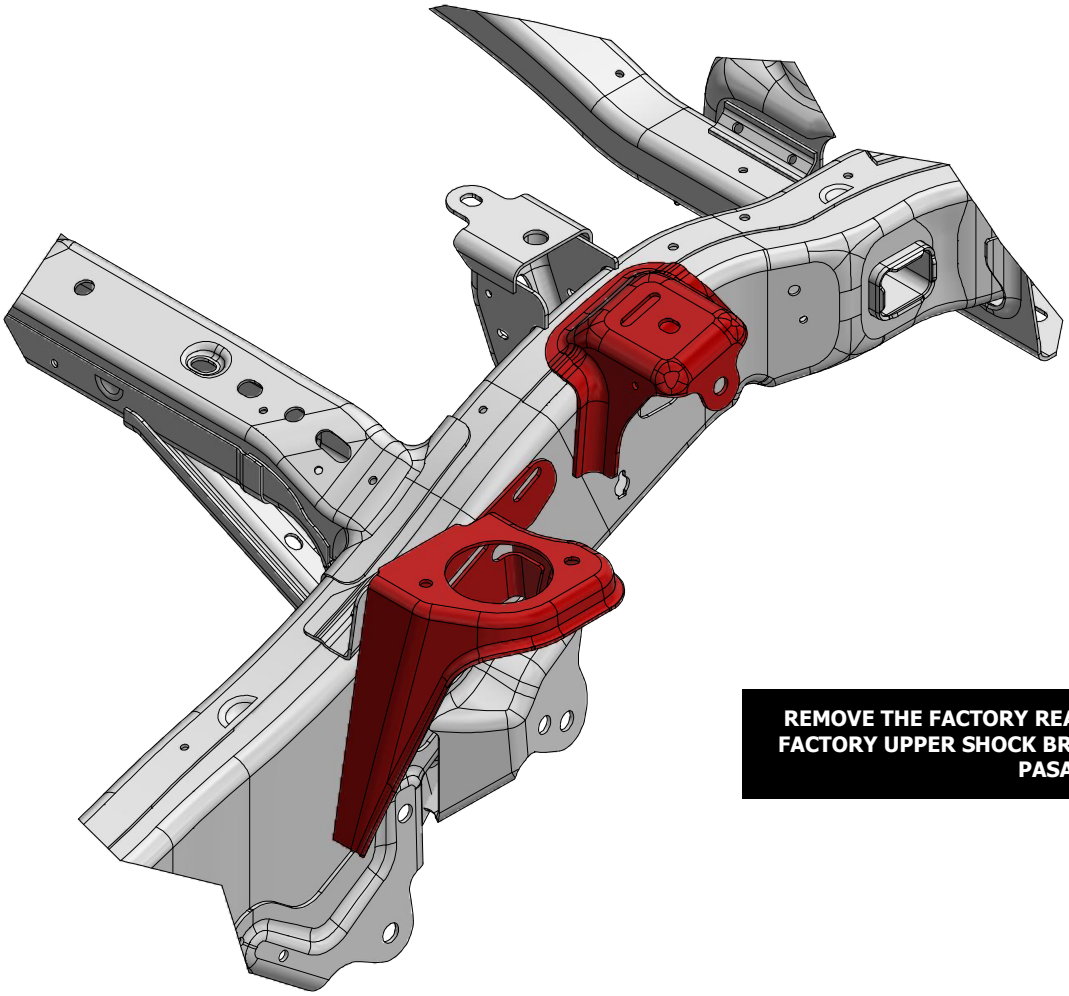

2. **Shock Compatibility:** This bracket is designed to work with a factory-style rear shock. If converting to a coilover setup, **MB3114** is the recommended compatible component.

3. **Installation Skill Requrement:** We strongly recommend that this bracket be installed by a highly skilled fabricator or professional off road shop. This bracket supports a critical structural portion of the vehicle.

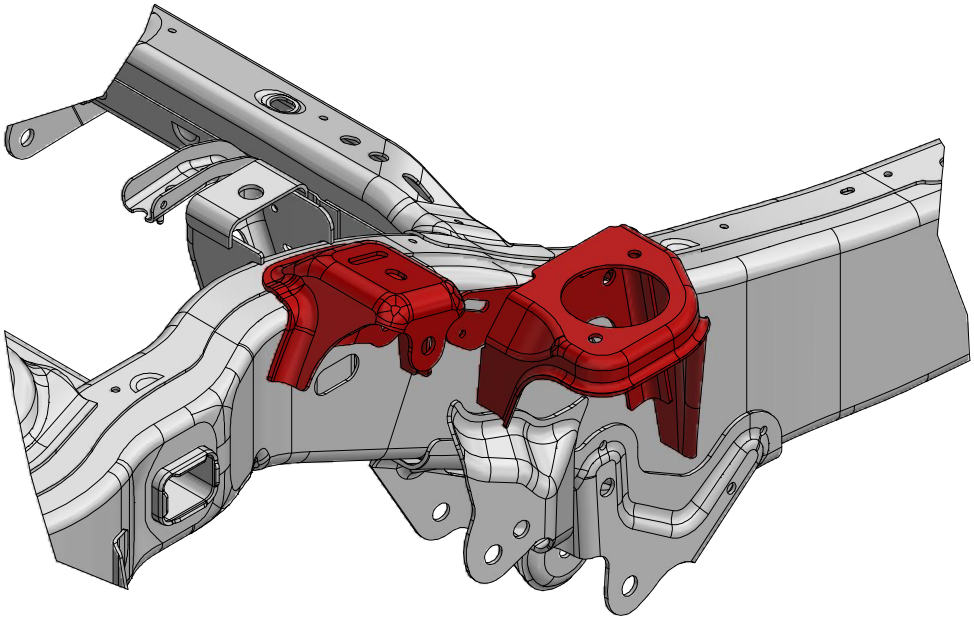

Pro Tip: Use STEEL-IT paint, which can be welded through and easily touched up afterward.

Note: Motobilt, Inc. products are intended for **OFF-ROAD USE ONLY**. See full legal disclaimer at the end of these instructions.
